

HYPER GEM LED

The American DJ Hyper Beam is a light-weight LED lighting effect that produces a large array of beams that will cover a medium size dance floor or ceiling, and provide the excitement you need to keep any party going! This unit uses 256 LEDs (64 Red, 64 Green, 64 Blue & 64 White LEDs) and may be controlled by sound of music with it's own built-in programs, or customize your own light show using a DMX Controller. Users can also link up multiple Hyper Gem LEDs with DMX cable to produce a sound activated synchronized light show.

The Hyper Gem is built to last with long-life LED technology (rated at 100,000 hrs), and has no moving parts inside. The unit stays cool so you can run it all night long. Plus, there's no cool down time at the end of a gig, so you can just pack it up and go!

Specifications:

- 4-way LED Moonflower effect with sharp Red, Green, Blue and White high output color beams
- Produces unique LED patterns that can be projected on a dance floor, wall or ceiling
